Contents Volume 38 (2004)

A numerical model for surface energy balance and thermal regime of the active layer and permafrost containing unfrozen water
F. Ling and T. Zhang 1
Experimental devices to determine snow avalanche basal friction and velocity profiles
F. Tiefenbacher and M.A. Kern 17
Laboratory investigation on cooling effect of coarse rock layer and fine rock layer in permafrost regions
W. Yu, Y. Lai, X. Zhang, S. Zhang and J. Xiao 31
Subsurface fate of spilled petroleum hydrocarbons in continuous permafrost
K. McCarthy, L. Walker and L. Vigoren 43
Location of avalanche victims with ground-penetrating radar
A. Instanes, I. Lønne and K. Sandaker 55
Characterizing soil organic matter quality in arctic soil by cover type and depth
D.M. White, D.S. Garland, C.-L. Ping and G. Michaelson 63

Guide for Authors 75

Ground temperature monitoring and its recent change in Qinghai–Tibet Plateau
W. Qingbai and L. Yongzhi 85
Soil freezing point as obtained on melting
T. Kozlowski 93
Laboratory experiments on oil spreading in broken ice
J.K.Ø. Gjøsteen and S. Løset 103
A model for oil spreading in cold waters
J.K.Ø. Gjøsteen 117
Effect of water saturation on deterioration of welded tuff due to freeze-thaw action
T.C. Chen, M.R. Yeung and N. Mori 127
Laboratory and field testing on rate of frost heave versus heat extraction
Å. Hermansson 137
Hydraulic conductivity change of bio-barrier formed in the subsurface by the adverse conditions including freeze–thaw cycles
G. Kim 153
Three-dimensional nonlinear analysis for temperature characteristic of ventilated embankment in permafrost regions
Y. Lai, Q. Wang, F. Niu and K. Zhang 165
Ice loads on the caisson structures in the Canadian Beaufort Sea
G.W. Timco and M. Johnston 185
The compressibility of ice to 2.0 kbar
G.M. Marion and S.D. Jakubowski 211
Experimental researches of thermal diffusivity and conductivity in embankment ballast under periodically fluctuating temperature
B. Sun, X. Xu, Y. Lai, D. Li, S. Wang and J. Zhang 219
The numerical study on the ventilated embankment in permafrost regions in Qinghai–Tibet railway
S. Bo, L. Ning and Q. Xiaojuan 229
Evaluation of bergy bit populations on the Grand Banks
G. Crocker, J. English, R. McKenna and R. Gagnon 239
